

CANTILEVER

RESIDENTIAL

SERVICES

Cantilever Studio is a full service design firm specializing in sustainable, innovative, high quality design. No project is too small, nor to large for our consideration.

We cater to homeowners in the Upper Midwest. Our approach to each project, and the services we will provide are specifically tailored for each client.

A discussion with us will determine the appropriate services to meet your needs and budget.

- * Construction Drawings (CAD)
- * 3-D Renderings and Models
- * Budgeting
- * Bid Negotiation
- * Construction Observation
- * Construction Management
- * Furniture Design
- * Lighting Design
- * Interior Design

THE OWNER and DESIGNER

Chad Cornette began his education with years of hand-on construction while attaining his Bachelors and Masters Degrees in Architecture from UW Milwaukee and the Frank Lloyd Wright School of Architecture. Following his three-year professional internship, Chad opened the CANTILEVER Studio in De Pere, Wisconsin.

A cabinet maker, a glass cutter, welder, framer, world traveler, and architectural intellect, Chad offers a unique and creative perspective toward building design. His design inspiration is a marriage of his clients' lifestyles, the building site, and sustainability to create timeless designs of art and beauty.

GREEN BUILT

CANTILEVER

GREEN BUILT DESIGN SERVICE

PHILOSOPHY

Architecture that is responsive to its environment should enhance the site and work with all surrounding elements. Whether a tight urban space or in the "middle of nowhere," every building site informs design. As in good jazz, the horn player works with and becomes a part of the rhythm section, a building must embrace its locale and play off its surroundings.

There should be a balance in built form that echoes the give and take of the natural environment. An ecosystem contains constituent parts that make up the whole, we strive to create articulated parts that work together on many levels in the development and composition of your project.

It is our ultimate ambition to create projects that are pleasing and functional to the user while maintaining a clear design direction.
